

# Functionalities.

Discover why leading transport companies choose  
PayHours 2.0.

## Workforce & Time Management for Transport & Logistics.

### One platform. Infinite insights.

PayHours 2.0 is the Workforce & Time Management System (WTMS) solution for the transport and logistics sector. Below, you can see at a glance why leading transport companies choose PayHours 2.0.

Think standard API integrations, support for mixed fleets, and functionality for international mixed CLAs. Company-specific schemes, standards, HRM, and payroll support are also integrated. In addition, PayHours 2.0 offers AI-based checks and analyses that provide insight into deviating hours and areas where money is leaking away.

#### OPEN & INDEPENDENT

##### INDEPENDENT

PayHours 2.0 records data from various data sources through standard API integrations with:

- All major onboard computer brands
- (Smart) tachographs and fleet management systems
- Time registration systems for non-driving staff
- TMS and ERP systems

##### DATA COMMUNICATION

- API integrations with HR and payroll systems, FMS, TMS, and BI tools - for both import and export
- Synchronisation at a self-configurable frequency for trip data, employees, vehicles, activities, and changes in question flows
- Standard PayHours API available for all types of integrations.

## Workforce & Time Management for Transport & Logistics

## ALERTS & VISUAL CORRECTIONS

- Configurable proactive alerts on the user's home screen
- Insight into hours requiring correction based on customer-specific KPIs
- Checks based on the "Management by Exception" principle
- Visual trip control via graphical overview - correct trips and activities with minimal clicks
- GPS on the map - all trips of every vehicle on an interactive graphical map: from starting point to final destination, including all stops along the way.

## SMART PLANNING, SMART PROCESSING

### WORK SCHEDULES & LEAVE PLANNING

- Support for both standard and alternating work schedules
- Registered schedules are immediately visible when entering manual hours
- Automatic alerts when absences are booked on non-scheduled working days.

### SMART WORKFLOWS

- Workflow-oriented, with homepage tasks and alerts, including alerts based on custom fields
- Fully configurable to the user's workflow and administration
- Result: high adoption rate among end users

## CLA COVERAGE & STANDARDS

### TIME-BASED CLAs & REGULATIONS

Standard available CLAs and regulations:

- TLN, AGF, LEO, GEO, GGF/GFG, and garage companies
- International: BE, DE, CZ, RO, PL, EN, and FI (mixed CLAs)

*In addition: an active willingness to add new company-specific CLAs and regulations.*

### STANDARDS, BREAK SCALES & USER ROLES

- Full support for irregular hours allowance
- Extensive options for standards and automatic corrections based on duration, location (GPS position), depot location, or a combination of these
- Automatic break and activity corrections based on question flows

## Workforce & Time Management for Transport & Logistics

## FUTURE-PROOF & EFFICIENT

### TECHNOLOGY FOR THE FUTURE

- Built on the robust Microsoft .NET Core 8.0 platform
- Developed with the Microsoft Entity Framework
- Fully web-based – future-proof for maintenance, updates, and scalability
- Native support for Office 365 export and cloud storage

### TIME AND COST SAVING

- Less time spent on complex time calculations for both driving and non-driving staff
- Easy application of domestic and foreign CLA rules
- Company-specific agreements and standards set up quickly

**Up to 12 hours less correction work per week.**

## ONE PLATFORM - MULTIPLE SOLUTIONS

### OPTIONAL IN-HOUSE SOFTWARE SOLUTIONS

Within the same user environment, you can also choose to fully manage the following in-house administrations:

- Payroll administration, including payslips, via PayRoll NG
- HR administration via HRM NG

*One platform, one environment - no separate integrations needed.*

### ACTIVE IN THESE SECTORS

- Transport & logistics
- Waste & environmental services
- Ground, road and hydraulic engineering
- Construction companies and contractors
- Courier companies
- Service and installation companies
- Pharmaceutical and refrigerated transport
- Vertical transport
- Urban and regional public transport
- Government & municipalities
- Production and trading companies with their own transport department

## Workforce & Time Management for Transport & Logistics

### **PAYHOURS 2.0 MOBILE APP - TWO IN ONE (ANDROID & iOS)**

The PayHours 2.0 mobile app is the only driver/employee app that combines actual driver hours with HRM/PayRoll data

#### **TWO IN ONE.**

- View uncorrected and corrected hours, request leave and check leave balances, submit expense claims, and view documents and payslips
- Manually enter and correct worked hours and other types of hours.
- Seamless integration with PayHours 2.0 time and payroll pre-processing calculation.

*Benefit for HR and Planning: time savings, overview, and certainty.*

### **TIME REGISTRATION VIA QR CODES (ANDROID & iOS)**

- Via mobile app
- Time registration via QR codes for non-driving staff
- Also suitable for driving staff working on location
- No physical booking terminals or clocking systems
- Print and place the QR codes yourself in the most suitable location
- Seamless integration with PayHours 2.0 time and payroll pre-processing calculation

*Cost savings instead of a cost item.*

## AI TIME MONITORING & ANALYSIS

- Default and custom unlimited queries on the PayHours 2.0 historical and current database
- Continuous analysis of all worked hours, patterns, and deviations
- Makes visible where hours deviate, where patterns emerge, and where money leaks away
- **Combines onboard computer/telematics data and tachograph data for maximum insight and accurate payroll pre-processing**
- Predictive insights - predictive analyses that identify future bottlenecks before they occur
- Self-learning AI - algorithms that autonomously correct processes and become smarter every time
- Powerful BI tool: collect, analyse, and visualise data from multiple sources, together with data from PayHours 2.0

**The power of smart innovation. Achievable savings of thousands of euros per month.**

## PROVEN ECOSYSTEM

### PARTNERS & COLLABORATIONS

- ZF/Transics - seamless integration PayHours 2.0 / SCALAR
- AMCS · Waste & Environment - seamless integration PayHours 2.0 / PLATFORM
- Rietveld Fleetmanagement
- AddSecure - seamless integration PayHours 2.0 / ATX 3 and Codriver
- EasySecure
- GPS Buddy
- Trimble / Platform Science
- Mendix
- FleetGO (and Data2Track)
- Samsara
- Webfleet
- Apployee
